(II)</p> <p><b>481—58.45(135C) Dignity preserved.</b> The resident shall be treated with consideration, respect, and full recognition of dignity and individuality, including privacy in treatment and in care for personal needs.</p> <p><b>DESCRIPTION:</b></p> <p>Based on clinical record review, facility policy, and interviews, the facility failed to ensure 1 of 6 residents received kind and considerate care at all times and had been free from mental abuse. Staff interviews revealed while Resident #1 had been sitting on the toilet, Staff G made a video recording of Resident #1's bowel incontinent accident that was on the floor. Staff interviews revealed Resident #1's leg had been visible in the video. Staff interviews revealed Staff G posted the video recording on a social media site Snapchat sharing the video with Staff E and Staff A. Resident #1 did not recall the incident and a reasonable person would feel humiliated, degraded, and experience mental anguish knowing a staff had recorded their bowel incontinent accident while he/she had been sitting on the toilet and then shared the video on social media/with others. The facility failed to ensure staff displayed respect for Resident #1 when Staff G shared the video recording with others and Staff A then showed the video to two other staff (Staff C and Staff D). The facility reported a census 110 residents.</p>

	<p>Findings:</p> <p>The Minimum Data Set (MDS) assessment dated 1/4/17, identified Resident #1 had been diagnoses with non-Alzheimer's dementia and depression. The MDS indicated the resident needed limited assistance of 1 staff with transfer and toileting and frequently incontinent of urine. The MDS balance during transition and walking revealed Resident #1 did not walk or could not turn around and face the opposite direction while walking. A Brief Mental Status (BIMS) documented a score of 11. A score of 11 represented moderate cognitive impairment. Resident #1 used a wheelchair for mobility.</p> <p>A care plan with a focus area dated 4/87/16 identified alteration in activities of daily living (ADL) function and needed staff assistance. Resident #1's care plan directed staff to assist with transfer/s and toileting. The care plan identified Resident #1 had Major Depressive Disorder (MDD) with psychotic symptoms, anxiety disorder, and dementia with behavioral disturbance. The resident's diagnosis of depression was changed to MDD with psychotic symptoms on 12/29/15. The care plan identified Resident #1 had altered thought process/cognitive loss, and the resident's physician determined the resident's dementia with behavior disturbance was an appropriate diagnosis.</p> <p>Progress notes dated 3/1/17 at 4:57 p.m. documented</p>
