F 000	INITIAL COMMENTS <i>DOC 8/17/18</i>  Investigation of Complain # 75063-C was substantiated because it resulted in a deficiency not specific to the allegation.  Complaint #75555-C was substantiated.  Complaint #76863-C was substantiated.  See Code of Federal Regulations (42CFR), Part 483, Subpart B - C.  F 684 Quality of Care SS=G CFR(s): 483.25  § 483.25 Quality of care Quality of care is a fundamental principle that applies to all treatment and care provided to facility residents. Based on the comprehensive assessment of a resident, the facility must ensure that residents receive treatment and care in accordance with professional standards of practice, the comprehensive person-centered care plan, and the residents' choices. This REQUIREMENT is not met as evidenced by: Based on clinical record review and physician and staff interviews, the facility failed to appropriately intervene after a resident exhibited physical signs/symptoms of a decline in status over a two week period (#3) and failed to assure another resident received physician ordered interventions to promote wound healing (#2) of 9 total residents reviewed. The facility reported a census of 61 residents.  Findings include:  1. According to the 2/28/18 Minimum Data Set	F 000	This serves as the credible allegation of compliance for Granger Nursing and Rehabilitation Center. We assert that all correctives described on this plan of correction have been implemented, in regards to the specific deficiencies; we have outlined our corrective actions and continued interventions to assure compliance with regulations and our plan of actions. The staff of Granger Nursing and Rehabilitation Center is committed to delivering high quality healthcare to its residents to obtain their highest level of physical, mental, and psychosocial functioning. We respectfully submit that Granger Nursing and Rehabilitation Center is in substantial compliance as set forth below. We are confident that we will be found in substantial compliance as set forth below. We are confident that we will be found in substantial compliance upon re-survey.  The statements made on this plan of correction are not an admission to and do not constitute an agreement with the alleged deficiencies. Granger Nursing and Rehabilitation Center has completed the following interventions as a result of complaint survey exiting 7/30/18. The facility will be in substantial compliance by 8/17/18.  Concerns identified will be addressed and reported in the facilities quality assurance compliance meetings for additional intervention as indicated.

Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

Resident #2 had a large eschar (dead tissue) medially (inside of the leg) and a smaller one laterally (the side of the leg). After removal of the gangrenous (dead) skin, the physician identified a small amount of purulence (fluid caused by infection) medially and an old hematoma (localized collection of blood) laterally. The doctor documented the resident's middle staples as intact, but his medial and lateral incision staples had been removed in the areas where there was a wound care issue. The doctor thought the wound should heal with daily packing with wet to moist dressings and debridement (removal of unhealthy tissue) in a couple of weeks. The plan included a subsequent visit for re-debridement in 2 weeks.</p> <p>The February 2018 TAR (Treatment Administration Record) documented staff cleansed the resident's RLE incision with an unspecified cleanser, covered it with clean 4x4s (gauze) and secured the gauze with Kerlix QD from 2/2/18 through 2/16/18, even though the 2/1/18 order discontinued the wound dressing to the right leg and another order had not been obtained for treatments until 2/13/18 with Betadine BID. The TAR also documented staff cleansed the RLE incision with an unspecified</p>	F 684

F 684	<p>Continued From page 9</p> <p>cleanser, covered it with clean 4x4s (gauze) and secured with Kerlix BID from 2/16/18 through 2/22/18, despite the 2/13/18 order specifying that the incision should be cleansed with Betadine and wrapped BID. The TAR also documented staff packed Resident #2's stump with gauze strips moistened in normal saline and wrapped with gauze BID from 2/24/18 through 2/28/18, despite the 2/23/18 order instructed a daily treatment instead.</p> <p>The Peripheral Vascular note dated 3/7/18 documented the 2 week follow up for peripheral arterial disease and lower right BKA. The physician recommended operative debridement to the right medial and lateral incision with necrotic tissue. The doctor also noted the need to "get a handle on the infection" to make sure Resident #2 did not lose his BKA stump and convert it to above the knee amputation. The doctor wrote that Resident #2 may be a candidate for a wound vac (vacuum device used to heal wounds) and at this point there is too much infection, but after a couple days of wound changes in the hospital it might be a possibility.</p> <p>The Vascular Discharge Summary noted that Resident #2 admitted to the hospital on 3/14/18 and discharged on 3/17/18. The resident's had diagnoses of a a past right BKA with medial and lateral incision dehiscence (rupture along the incision) with infection. The resident had debridement of the right stump and placement of a wound vac to be utilized after being discharged. The discharge order also indicated the stump should continue to be packed with gauze strips moistened in normal saline and wrapped with roll gauze BID. The plan included a follow up appointment in 2 weeks for a wound check.</p>	F 684

F 684	<p>Continued From page 10</p> <p>A nurse's note dated 3/17/18 at 6:58 p.m. noted that Resident #2 re-admitted to the facility after hospital stay for debridement. New orders accompanied the resident for a wound vac on 3 areas of his stump.</p> <p>The Peripheral Vascular recheck note of 3/21/18 documented a post-hospital and 3/14/18 debridement follow up. Resident #2 presented with a mild low-grade infection and also clotted blood on the wound surface, rendering the wound vac ineffective. The doctor ordered to discontinue the wound vac and initiate wet to dry dressings BID, to wash the wound thoroughly in the shower with water QD to keep the bacterial count down and a 2 week follow up appointment.</p> <p>The Physician Progress Notes dated 3/21/18 ordered staff to apply wet to dry dressings 3 times a day (TID) and a follow up appointment scheduled on 4/6/18 at 10:10 a.m.</p> <p>A nurse's note dated 3/25/18 entered late for 3/21/18 recorded Resident #2 had been seen for a follow up to the wound debridement. Staff received new orders to discontinue the wound vac and begin wet to dry dressings TID. The nurse's late entry lacked documentation the doctor also ordered the wound to be washed thoroughly with water in the shower every day.</p> <p>The March 2018 TAR documented staff packed Resident #2's stump with gauze strips moistened in normal saline and wrapped with gauze BID from 3/1/18 through 3/13/18, despite the 2/23/18 order stipulating QD instead of BID. The TAR also documented the right stump had been treated with a wound vac on 3/19/18 and 3/21/18.</p>	F 684

Staff C said he approached the overnight nurse responsible for completing the dressing change and had her do the change before she left that morning. Staff C recalled a similar situation with another nurse. He found his own initials and date he last changed Resident #2's dressing, indicating the other nurse failed to change the dressing on his shift. Staff C said he wrote the staff member up the next morning.</p> <p>On 7/12/18 at 11:00 a.m., the DON stated the resident's February TAR as of 2/13/18 stipulated that staff should cleanse Resident #2's incision site with Betadine before wrapping the BKA BID. Due to a transcription error, the February TAR simply instructed staff to cleanse the incision site, but did not stipulate what to cleanse it with. Instead of correcting the TAR to reflect the order, the DON said she expected each person to go to the chart and refer to the order. When asked if she could see how by not correcting the TAR, the potential for error increased, the DON agreed that it seemed reckless and she expected someone to notice the mistake and correct it.</p> <p>A subsequent interview on 7/18/18 at 8:15 a.m. with Staff C revealed more details about the time he discovered that a nurse failed to complete a dressing change. When asked about the possibility the offgoing nurse still had time and the intention to change the dressing before the end of the shift, Staff C said he approached the nurse about 6:05 a.m. standing at the nurse's station with her coat on and about to leave the building. Staff C said he made her take off her coat and change the dressing before she left.</p>	F 684

F 686	Continued From page 14	F 686	F 686 SS=G TREATMENT/SERVICES TO PREVENT/HEAL PRESSURE ULCER: Granger Nursing and Rehabilitation Center will ensure that each resident receives care, with the consistent standards of practice, to prevent pressure ulcers and each resident does not develop pressure ulcers unless the individual's condition demonstrates that they were clinically unavoidable. Each resident with a pressure ulcer will receive necessary treatment and services, consistent with professional standards of practice, to promote healing, and to prevent infection and new ulcers from developing. Resident # 1 has been discharged from the facility. The Director of Nursing and facility administrator re-educated all staff on the importance of follow physician's orders, wound care, physician notification in treatment of wounds on 8/3/2018. Effective immediately, the facility administrator and/or Director of Nursing will print a medication and treatment report from AHT (the electronic health record) and bring to the morning meeting for review to ensure all medications and treatments are being administered per physician's orders. The charge nurse on the weekend will review all MARS/TARS to ensure treatments and medications are followed per physician's orders. The physician and nurse responsible for any discrepancy in orders noted will be contacted within the 24-hour period to follow up accordingly. The facility is in the process of		
F 686 SS=G	Treatment/Svcs to Prevent/Heal Pressure Ulcer CFR(s): 483.25(b)(1)(i)(ii)  §483.25(b) Skin Integrity §483.25(b)(1) Pressure ulcers. Based on the comprehensive assessment of a resident, the facility must ensure that- (i) A resident receives care, consistent with professional standards of practice, to prevent pressure ulcers and does not develop pressure ulcers unless the individual's clinical condition demonstrates that they were unavoidable; and (ii) A resident with pressure ulcers receives necessary treatment and services, consistent with professional standards of practice, to promote healing, prevent infection and prevent new ulcers from developing. This REQUIREMENT is not met as evidenced by: Based on clinical record review and physician and staff interviews, the facility failed to administer treatments as prescribed to promote pressure ulcer healing for 1 of 3 residents sampled for wound treatments (Resident #1). The facility reported a census of 61 residents.  Findings include:  1. According to the 3/9/18 Minimum Data Set (MDS) assessment, Resident #1 had diagnoses that included heart failure, diabetes, stroke, chronic kidney disease and cognitive communication deficit. The MDS documented the resident required extensive assistance of 1 to 2 staff for all activities of daily living (ADLs). The assessment also noted Resident #1 had the risk for developing pressure ulcers. The MDS indicated Resident #1 received pressure ulcer care for one existing ulcer, a Stage 4 ulcer	F 686 F 686

F 686	Continued From page 18  The Wound Center Final Report dated 3/29/18 documented the progress notes of the Nurse Practitioner's (NP) assessment of Resident #1 and subsequent plan. The NP opened the resident's Stage 3 pressure ulcer on the right heel and obtained a culture. The NP documented her plan included applying Betadine to the wound, covering it with gauze and securing it with roll gauze and tape. Skin prep should be applied to the wound margins prior to applying the wound dressing; change BID.  The March 2018 TAR documented staff applied Betadine 10% solution to Resident #1's right heel wound, covered it with gauze wrap and secured the wrap with Kerlix and tape BID that month with the exception of treatments only being administered once on 3/12/18, 3/13/18, 3/23/18 and 3/27/18 and neither of the treatments provided on 3/26/18 and 3/29/18. The TAR indicated the treatment order had been discontinued on 3/29/18. The TAR noted a new treatment order beginning on 3/29 to cleanse Resident #1's right heel with 0.25% acetic acid, pat dry, paint the site with Betadine, apply a soaked gauze dressing the size of the wound and secure it with Kerlix twice a day.  The March 2018 Administration Record documented staff did not complete the treatments scheduled for 3/12/18 and 3/13/18 and 3/29/18 at 6:00 p.m. due to the resident being asleep. Staff did not apply the treatments on 3/26/18 and 3/27/18 at 6:00 p.m. because the resident refused. The record contained no documentation that staff re-approached the resident at a later time. The TAR documented no provision of the 6 a.m. treatment on either 3/29 or 3/31/18.	F 686

F 686	<p>Continued From page 21</p> <p>initials and the date she changed it were written on the dressing. Resident #1's right heel wound definitely got worse, it went from a stable wound to one you could smell down the hallway. Staff A stated the Director of Nursing (DON) makes lists of things that show on the computer as not completed and tells them to "clear the reds". When asked, Staff A said that means charting at a later time and/or date that a task was completed. Staff A stated she returned to work another time after having some days off and found 3 vials of Rocephin intended for Resident #1's use in the top drawer of the med cart, after the antibiotic should have been completed. Staff A told the DON about it and witnessed her throw the vials away in the trash container on the medication cart. Staff A thought it was possible that they pulled the antibiotic from the emergency medication kit, which could account for the 3 remaining vials, but she suspected the antibiotics were not given.</p> <p>An interview on 7/10/18 at 9:15 a.m. with the facility's Pharmacist revealed that Resident #1 had an order for Rocephin 1 gram (gm) to be given intramuscular injection (IM) QD for 5 days. The Pharmacist said they sent the medication on 4/2/18 and Rocephin had not been taken out of their emergency kit for administration.</p> <p>An interview on 7/10/18 at 12:15 p.m. with Staff C, LPN revealed that one of his duties as a wound nurse was to track the TAR and present a list of incomplete treatments and/or dressings to the appropriate staff person and instruct them to "clear the reds". Staff C said nobody ever told him they did not remember completing a task or refuse to chart a late entry. Staff C stated they just took the list and did it and he has had to</p>	F 686

F 686	<p>Continued From page 22</p> <p>reconcile things as long as 2 weeks old, but he has a good memory. Staff C mentioned seeing a dressing he put on Resident #1's foot one day, after it should have have been changed again on the evening shift that followed him. Staff C could not remember the name of the person that failed to change the dressing, but recalled they charted they did it when they did not. When asked how he knew for sure that they did not do the dressing change, Staff C said his name and the date he changed it marked the dressing. Staff C believed it was one of two people because they frequently failed to change dressings.</p> <p>An interview on 7/11/18 at 8:00 a.m. with the DON revealed that Resident #1 went to the hospital on 2/6/18 and re-admitted on 2/10/18 without treatment orders. As a result, the record lacked documentation to verify that staff treated Resident #1's foot between 2/11/18 and 2/15/18. The DON checked to see if the wound nurse or re-admitting nurse called about orders, but she did not find any documentation to verify that. The DON said they should have at least called the hospital to see what they wanted to do after Resident #1 discharged on 2/10/18, but ideally they should have called the wound clinic. Resident #1 went to the Wound Clinic on the 2/15/18 or 2/16/18 and they faxed orders after the appointment. When asked about the times in March the TAR indicated Resident #1's treatments were not done, the DON said they write an explanation of why it was not done elsewhere. The DON said the resident refused 3 times. When asked about the lack of treatment because the resident was sleeping, the DON stated the nurse should have tried waking the resident, administered the treatment or contacted the doctor.</p>	F 686

F 686	<p>Continued From page 23</p> <p>An interview on 7/11/18 at 9:25 a.m. with the Administrator revealed that Staff C had previously been reprimanded and demoted to floor nurse because he charted he did some dressing changes, when in fact he had not. The Administrator said other staff reported the dressing they found on a resident did not have the LPN's initials and date as he documented, but another staff's initials from the dressing change they did before Staff C charted he completed it.</p> <p>On 7/11/18 at 9:35 a.m. the DON stated the wound clinic ordered the 3/29/18 Betadine dressing change daily and the nurse entered the order incorrectly. As a result, Resident #1 received treatments every other day instead of every day. The facility has a triple check system. The receiving nurse processes the order and has another nurse double check her. The DON did not know if the receiving nurse attempted to get the second check or if the second nurse didn't contact a nurse manager for the third check like they should have. The DON said that system fell apart.</p> <p>An interview on 7/17/18 at 11:57 a.m. with Staff B, RN revealed the facility always tells staff to make the 'reds go away'. They get a list of things like medications, treatments or tasks that are highlighted to indicate they have not been completed during their shift. Sometimes the list might be for something missed up to a week ago. There were times she didn't know if she completed some of the things on the list or just marked it completed to make the red go away. Staff B did not know what she should actually do and did not ask for an explanation; she does it to satisfy the facility because when they give each</p>	F 686

Depending on the circumstances, the doctor said "of course it could lead to amputation" if the wound was not properly cared for and the condition warranted amputation. The physician said he expected staff to follow doctor's orders. He said he expected them to notify him if his orders were not followed for any reason, even if another doctor thought a different treatment should be used.</p> <p>An interview on 7/19/18 at 2:20 p.m. with the Wound Center Triage RN revealed that if dressing changes are not done appropriately, as frequently as they are supposed to be, or if doctor's orders are not being followed then wounds can get worse. She also said depending on the amount of drainage and if the appropriate products are not being used, surrounding tissue can macerate and break down. The RN said wounds can also get contaminated and infected without proper hand hygiene.</p> <p>An interview on 7/19/18 at 4:20 p.m. with the Wound Center ARNP (Advanced RN Practitioner) revealed she saw Resident #1 once on 5/16/18.</p>	F 686

F 686	Continued From page 25  The ARNP said he had circulatory issues, renal disease and diabetes and that is why they treated him with an antimicrobial like Betadine; daily treatments can be very effective. The resident had osteomyelitis, but could not go through an MRI (magnetic resonance imaging) due to claustrophobia. If they were not doing treatments/dressing changes daily it could have caused his wounds to get worse and caused complications. Staff should have been following orders. The ARNP concluded if they invested the resources to have him sent to us, the facility would have had a vested interest in following our orders. The orders should have been followed to promote healing.	F 686

F 755	<p>Continued From page 28</p> <p>Tamsulosin 0.4 mg to Resident #4 as ordered. According to the Medical Director, staff believed a 'linkage' problem prevented the facility's computer from transmitting Resident #4's prescription information to the pharmacy. As a result, Resident #4 had not received Tamsulosin from approximately 1/31/18 through 4/28/18.</p> <p>An interview on 7/10/18 at 9:42 p.m. with Staff D, RN (Registered Nurse) revealed that he contacted the pharmacy almost every time he worked to get medication for Resident #4, which never arrived. Staff D said the resident did not have his Tamsulosin for March and April 2018. The RN said he cannot guarantee that he documented that he did not always give it, but he did sometimes. Staff D told the day nurses when they came in the morning and left notes to the Director of Nursing (DON) and said he got in trouble because he wrote that the medication 'unavailable. Once he contacted the on-call manager to get authorization to have the medication special-delivered. They denied the request because it would have been too expensive to have it delivered in the middle of the month.</p> <p>An interview on 7/16/18 at 1:45 p.m. with the DON revealed that as a result of this surveyor's inquiry, she realized they have a problem with their computer linking with the pharmacy's computer. The DON said they don't receive the order sometimes; it's pretty rare. Resident #4's Tamsulosin had never been delivered since he re-admitted on 1/31/18. The DON did not know why some people documented they gave it. The DON said she did not have any documentation from the pharmacy indicating they ever delivered Resident #4's Tamsulosin.</p>	F 755
