Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F 580	Continued From page 5 the document titled #1358 Un-witnessed where Staff A noted she informed the family of Resident #4's fall on 12/7/19 at 8:25 p.m.  An interview on 1/7/2020 at 10:20 a.m. with Resident #4's #2 contact person/daughter revealed that although the facility said they contacted her about the resident's fall; they did not. The family member said she checked to see if she missed their call. According to her, she did not receive any messages or missed calls from the facility. The family member said she did not know about the fall until Staff C notified her late afternoon on 12/9/19.  An interview on 1/7/19 at 2:30 p.m. with Staff A RN revealed that Resident #4 had increased confusion related to a UTI prior to the fall. Staff A said the facility never questioned her about whether or not she notified Resident #4's family about the 12/7/19 fall. When asked why she noted on the document titled #1358 Un-witnessed that she notified the family, the RN said she had every intention of notifying them but forgot to because of "everything I had going on". The resident said she suspected she broke her ribs right after she fell and told whoever assessed her that she had rib pain.</p> <p>An interview on 1/6/2020 at 12:25 p.m. with Staff C revealed she reported to work at 6:00 a.m. on Monday 12/9/19 after being off over the weekend. Staff C said the person that reported off to her at shift change told her she would need to follow up with Resident #4 because of a fall that occurred on 12/7/19. The RN said she did not recall if the person reported Resident #4 had rib pain. Staff C said she did not feel an urgent need to assess Resident #4 right away. When asked, the RN said she did not remember when she assessed Resident #4 for the first time that day. Staff C said she expected a fall follow up assessment completed at some point during her shift.</p> <p>According to Staff C, other staff members reported to her during the shift that Resident #4 complained of left rib pain. When asked, Staff C said she did not remember what time of the day they reported that. Staff C said she read the previous documentation because of recently getting poor reports at shift change. Staff C realized that someone charted Resident #4 had left flank pain the day before; which she associated to the left rib pain related to the fall.</p> <p>Staff C said she notified a family member on 12/9/19. According to the RN, that family member said nobody notified her about the fall; at which time the RN apologized.</p> <p>An interview on 1/6/2020 at 1:15 p.m. with Staff B LPN revealed her shift started at sometime between 5:45 and 6:15 a.m. on 12/8/19. Staff B</p>	F 684

F 684	<p>Continued From page 11</p> <p>said nobody reported to her at shift change that Resident #4 fell the evening before. Staff B said the CNAs brought Resident #4 to the nursing office during the day and said she complained of lower flank pain; just above her left hip. Staff B said Resident #4 received treatment for a UTI on and off so she immediately assessed her for that; not as a fall follow up. When asked, Staff B said she did not read the previous Nurses Note that documented Resident #4's 12/7/19 fall. Staff B said she might have approached the situation differently if she had knowledge of the fall to factor into her assessment of the resident. Staff B said she assessed for Resident #4's family on the morning of 12/8/19 about flank pain and recurrent UTIs; not injuries related to a fall.</p> <p>The LPN said someone told her when she returned to work after having a day off, that Resident #4 went to ER and received the diagnosis of fractured ribs. Staff B said "it wasn't until then that I realized she fell and broke her ribs". When asked, Staff B said the facility did not question her about what she knew or did not know about the fall.</p> <p>Per text correspondence on 1/6/19 between 1:34 p.m. and 1:48 p.m. with Resident #4's #1 contact person/daughter revealed the facility did not notify her of the resident's 12/7/19 fall until the following Monday 12/9/19 afternoon.</p> <p>On 1/7/19 at 8:40 a.m. the surveyor asked the Director of Nursing (DON) for follow up assessments of Resident #4's 12/7/19 fall. The DON said she did not have that documentation; it would be in progress notes if they had it. The DON said they did not have a "hot charting" system in place at the time. She typically handed</p>	F 684

F 684	Continued From page 12 them a paper with things they needed to do and/or follow up on during the week, but Resident #4's fall occurred on the weekend. The DON said "it's an excuse" if a nurse says they did not know about the resident's fall because someone did not pass it on in report. The DON said a nurse documented the fall in their electronic health record and other nurses are responsible to read those notes and follow up on them. The DON said a nurse did a subsequent assessment of the resident for symptoms of a UTI after the fall, but they should have known that she fell so they could assess for any injuries related to the fall.  An interview on 1/7/2020 at 10:20 a.m. with Resident #4's #2 contact person/daughter revealed that although the facility said they contacted her about her Mother's fall; they did not. The family member said she checked to see if she missed their call. According to her, she did not receive any messages or missed calls from the facility. The family member said she did not know about the fall until Staff C notified her late afternoon on 12/9/19.  An interview on 1/7/19 at 2:30 p.m. with Staff A revealed Resident #4 experienced increased confusion related to a UTI prior to the fall. The RN said the facility never questioned her about whether or not she notified Resident #4's family about the 12/7/19 fall. When asked why she noted on the document titled #1358 Un-witnessed that she notified the family, the RN said she had every intention of notifying them but forgot to because of "everything I had going on". F 689	Continued From page 16  f. The Director of Nursing (DON) completes an investigation of the elopement that includes possible causes, witness statements, immediate interventions any permanent interventions or prevention measures.  A Social Service Note dated 10/23/19 at 11:44 a.m. noted Resident #1's son requested the resident move off the Memory Unit. The document also noted that Resident #1 and her husband would move to a room on A Hall.  A Nurses Note dated 10/23/19 at 3:51 p.m. revealed Resident #1 moved to a room on A hall at her husband's request. According to the nurse, Resident #1 stated she did not like change.  An Activity Progress Note dated 10/24/19 at 5:23 p.m. noted that Resident #1 said the room change made her a bit anxious.  A document titled #1307 Elopement and dated 10/25/19 at 6:55 p.m. revealed 2 staff members saw Resident #1 ambulating with her walker outside of A Hall. According to the author (DON), Resident #1 wore a pink button up shirt, black pants and black shoes. The DON also noted the resident ambulated independently with a wheeled walker. The document identified predisposing physiological factors for the elopement as confusion and impaired memory boxes. The DON noted she checked the call light system and the door did not alarm; therefore she changed the Resident's Wanderguard and verified it worked. The DON identified no witnesses to the incident..  A Nurses Note authored by the DON and dated 10/25/19 at 9:10 p.m. noted she discussed	F 689	malfunction. Maintenance/designee to check doors monthly. Receptionist/designee to check doors daily. Representative contacted from wander system's company to ensure functionality. System is functioning correctly on 10-29-19.  Front doors are now locked and key pad with a code is required for entry. Wood door on service hall has been locked. Exit doors have been alarmed/locked. Education was immediately started with staff on 1-13-2020. Education is ongoing to capture each staff person prior to next working shift.  Immediate Jeopardy Abatement  Abatement Plan prepared 1/13/2020 and immediate jeopardy abated 1/14/2020:  Any resident who falls will have assessment thoroughly completed, including causative factors by a licensed nurse and careplan update. Nurses received education on assessment of resident falls. Nurse manager/designee shall review residents at risk for falls to assure POC in place with resident specific interventions.

F 689	<p>Continued From page 20</p> <p>The DON explained the exit doors were supposed to lock when an active Wanderguard bracelet got within a certain distance of the door. The DON also explained that the Wanderguard bracelet Resident #1 wore had never been activated; therefore it would not lock the door for her protection as intended. According to the DON, although they check Wanderguard bracelets every shift now, they were not checked at the time of the elopement. The DON said she checked the bracelet and it did not lock either of A Hall's exit doors. The DON said she also pushed the button on the bracelet and it did not appear on the computer; therefore it did not function as a call light or Wanderguard protection. The DON did not know if the Resident wore the inactive Wanderguard bracelet since admission or if someone changed it at some point and did not activate it then. Either way, the DON said it allowed Resident #1 to exit the door without supervision.</p> <p>According to the DON, another Resident said he saw Resident #1 go out A Hall's lounge area door. The DON said that door led her into an ungated courtyard and employees sitting in the designated outdoor break area saw Resident #1 walking on the sidewalk outside the door at the end of A Hall (approximately 100 feet away).</p> <p>An interview on 12/31/19 at 9:25 a.m. with Staff E, Transportation, revealed he and Staff D were outside under the shelter when they saw Resident #1 outside the exit door at the end of A Hall. Staff E said he did not see which direction the Resident came from. Staff E said Resident #1 made an abrupt turn which would have led her off the sidewalk, down a ditch and into a grassy area if they did not intervene. Staff E said he did not</p>	F 689

F 689	<p>Continued From page 21</p> <p>remember the time, but remembered it as just about dark. He also remembered it as cool outside but not cold; probably in the 50s. Staff E said Resident #1 had a pink zip up "sweater thing" on.</p> <p>Staff E said they informed the nurse immediately and they started checking to see why the bracelet did not cause the door to lock. Although he did not know for sure, he thought the bracelet may have been defective or had a bad battery. According to Staff E, they changed the bracelet and did not had any more problems since.</p> <p>An interview on 12/31/19 10:35 a.m. with Staff D, CMA revealed she and another employee were on break at the outdoor picnic table when they saw Resident #1 walking with her walker on the sidewalk about 20 feet from the exit door at the end of A Hall. Staff D said she did not know which door the resident exited the building from. According to the CMA, it was chilly outside. The resident wore a shirt, sweater, pants, shoes and socks. Staff D said she did not know how the resident got outside without someone knowing it because she wore a Wanderguard bracelet. Staff D stated nobody knew Resident #1 got out until they discovered her. The CMA said "thank God I happened to be outside; I don't know if they would have found her or not". Staff D described it as a very stressful situation.</p> <p>A subsequent interview on 12/31/19 at 11:35 a.m. with the DON clarified the Nurse Consultant's comment that Resident #1 did not need Wanderguard protection at the time of the elopement. The DON clarified that they intended for Resident #1 to wear the bracelet for Wanderguard protection in addition to its call light</p>	F 689

F 689	<p>Continued From page 22</p> <p>function. The DON said they just moved the resident off the dementia unit; which automatically qualified her as a candidate to wear a Wanderguard bracelet. The DON said Resident #1 needed it due to her dementia and during an adjustment/trial period to determine if she should continue to wear it since she no longer resided on the locked Memory Unit. The DON further explained that Resident #1's bracelet did not appear in the computer system; which identified it as inactive and enabled the Resident to get out without setting off an alarm. The Nurse Consultant apologized to the surveyor and said she did not know they intended for the resident to wear a Wanderguard bracelet.</p> <p>An interview on 1/7/19 at 2:30 p.m. with Staff A, RN revealed she just started working for the facility 4 days before Resident #1 eloped. Staff A believed Staff D notified her about the elopement as she worked in the Memory Unit. Staff A wondered how the resident got out without setting off an alarm because she wore a Wanderguard bracelet; which she replaced with a new one. The RN said she notified the DON.</p> <p>An interview on 1/8/20 at 2:45 p.m. with the Maintenance Supervisor revealed that each door contained a reader, a computer and a sensor. With all that technology, the door and/or alarm can malfunction any time one of those components does not work like it should. The Maintenance Supervisor said he received calls about malfunctioning doors; which work fine when he checks them. He said the system should work all the time.</p> <p>An interview on 1/13/20 at 12:30 p.m. with the State Climatologist revealed that the sun set at</p>	F 689

The MDS identified Resident #2 as unsteady and only able to stabilize with staff assistance. The MDS identified Resident #2 with frequent episodes of bowel and bladder incontinence. According to the MDS, Resident #2 had 2 falls without injuries and 2 with non-major injuries since she admitted to the facility or since her prior assessment. The resident admitted to the facility 7/19/17.</p> <p>The 11/30/16 Care Plan identified Resident #2 at risk for falls related to dementia, gait and balance disturbances, poor safety recognition and impulsivity that sometimes kept her from calling or waiting for staff assistance. The care plan directed staff to review information from falls and attempt to determine a cause. Staff should toilet Resident #2 before and after meals and at bedtime. An intervention implemented on that date noted that staff should maintain a safe environment for Resident #2. The 12/2/16 Care Plan noted altered thought affecting cognitive functioning, mood, behavior and psychosocial well-being and implemented an intervention on 12/8/16 instructing staff to be attentive to her needs; observe for signs or symptoms of discomfort, anxiety being overwhelmed etc. According to the 3/20/17 intervention, Resident #2 should not be left unattended in the bathroom. They included Resident #2's risk of elopement and wandering on 4/17/19 and instructed staff to distract her from wandering. On 11/5/19; staff should offer toileting after they identified standing and self-transferring attempts as a fall indicator.</p> <p>A document titled Fall Risk Assessment dated</p>	F 689

F 689	<p>Continued From page 26</p> <p>10/26/19 noted Resident #2 with 3 or more falls in the last 6 months. Along with additional factors, the facility identified her at risk for falls related to cognitive impairment, mobility status, poor safety awareness and multiple medications.</p> <p>A document titled #1318 dated 11/4/19 at 8:20 p.m. identified an unwitnessed fall in the resident's room. Staff found Resident #2 on the floor at the end of her bed. The resident laid on her stomach and was incontinent of urine. The resident bled from the mouth from possibly biting her tongue during the fall. Both of her knees were "skinned up". Staff got the resident off the floor via hooyer lift. The resident could not give a description of the incident. Following the fall, the resident expressed occasional moans/groans and had a sad, frightened expression on her face. The document identified the resident's mobility as wheelchair bound. Predisposing physiological factors listed: incontinence, weakness, gait imbalance and impaired memory. The resident ambulated without assistance. A care plan revealed a new intervention dated 11/7/19 for 11/4/19 Mattress on floor by bed until floor mat available. The document did not identify when staff last saw or toileted the resident.</p> <p>A document titled #1319 identified a witnessed fall in the resident's room dated 11/5/19 at 7:00 a.m. Staff reported the resident maneuvered herself off her bed into a kneeling position on the fall mat. The CMA reported the resident previously sat at the edge of the bed. The CMA left the room to get somebody else to help with ADLs and found the resident lying on the fall mat when she returned. The fall document identified predisposing factors for the fall as confusion, impaired memory and side rails up. The resident</p>	F 689

The MDS assessment dated 11/17/19 noted Resident #3's diagnoses as arthritis, Alzheimer's disease and dementia. According to the MDS, Resident #3's BIMS score of 3 out of 15 indicated he had severely impaired cognition with inattention and disorganized thinking. The MDS also noted that Resident #3 either depended on staff completely or required extensive assistance of 2 staff members for most ADLs. According to the MDS, they considered Resident #3 unsteady. The MDS noted that Resident #3 frequently had episodes of bowel and bladder incontinence. According to the MDS, Resident #3 had 2 falls without injuries since he admitted to the facility or since his prior assessment. The resident admitted to the facility 11/15/18.</p> <p>The 11/27/18 Care Plan noted Resident #3's ADL self-care deficit related to dementia. The care plan indicated Resident #3 did not ambulate at the time and required 2 staff to assist him with a gait belt to stand, pivot, toilet and transfer. The 11/29/18 Care Plan indicated Resident #3's thoughts were altered by dementia and therefore staff should provide cues, supervise as needed and anticipate and meet his needs. The Care Plan also instructed staff to promptly respond to all the Resident's requests related to his risk for falls due to confusion and wandering. The care plan did not identify the resident frequently self transferred or failed to use a call light. The care</p>	F 689

F 689	<p>Continued From page 34</p> <p>hip pain. As Other Info, the nurse included that the resident fell when he attempted to self-transfer while sitting in the common area. Predisposing Physiological Factors were confusion and incontinence. The nurse also identified Resident #3 as a wanderer and ambulating without assistance as a Predisposing Situational Factors. The DON noted that ER identified a fracture. The document did not identify when staff last saw or toileted the resident. The care plan did not contain a new intervention following the incident. The care plan did not contain a scheduled toilet plan.</p> <p>A Major Injury Determination Form dated 12/10/19 at 6:25 a.m. noted that the facility informed the physician that Resident #3 sustained a right hip fracture when he fell on the floor in the day hall on 12/9/19 at 6:30 p.m. The physician noted on 12/10/19 at 10:00 a.m. that he considered the injury a major injury.</p> <p>An interview on 12/30/19 at 12:40 p.m. with Staff J, CNA, revealed Resident #3 could walk on his own before he broke his hip, but one person assisted him for his safety due to his age and being so unsteady. According to Staff J, he had a history of self-transfers. She said he probably needed to go to the bathroom; which she described as a factor that precedes his self-transfer attempts. Staff J said he will not wait. He will get up right away. According to the CNA, Resident #3 wore a call light bracelet which he did not know how to use.</p> <p>The CNA identified the Memory Unit as usually staffed with a CMA and a CNA. She said the common area is usually left unsupervised when both workers have to help residents that require</p>	F 689

Staff J described leaving the common area unsupervised as unsafe and thinks falls have occurred as a result; like what happened with Resident #3. The CNA said she heard Staff H left Resident #3 unsupervised while toileting someone else.</p> <p>An interview on 12/30/19 at 1:15 p.m. with Staff I, CMA, revealed that Resident #3 had a history of self-transferring on "a whim"; it does not matter if he is in his room or the common area. According to Staff I, Resident #3 used his call light/bracelet occasionally if he remembers to use it. She said the resident will get up on his own if someone does not get to him right away.</p> <p>The CMA said typically they are staffed with a CMA and a CNA on the Memory Unit. Staff I said Resident #2 and Resident #3 both require assistance of 2 people along with 2 other Residents that need those same accommodations on an as needed basis. Staff I said the Activity Director will supervise the room when both staff members have to help a Resident at the same time. The CMA said that is "hit and miss"; they do not recruit her help if she does not happen to be there.</p> <p>An interview on 12/30/19 at 1:55 p.m. with Staff G revealed that she worked on the Memory Unit a couple times a week. According to the CNA, Resident #3 had a history of self-transferring even before his 12/9/19 fall. Although Staff G could not identify a pattern; she said Resident #3 would self-transfer at any given time.</p> <p>The CNA said they usually staffed the Memory Unit with a Medication Aid (CMA) and a CNA;</p>	F 689

According to the CNA, approximately 4 Residents required the assistance of 2 staff members; including Resident #3. Staff G said nobody typically supervised the common area when both workers were in a resident's room. She said self-transfers are common on a Memory Unit and leaving them unsupervised increases their risk of falling.</p> <p>An interview on 12/31/19 at 1:45 p.m. with Resident #3's daughter revealed her input regarding her Father's 12/9/19 fall. She wondered how it happened; "he's just confused enough where he thinks he can get up on his own". According to his daughter, she redirected him in the past when she saw him trying to get up on his own at times. She said her Father fell at home now and then; which accounted for one of the reasons they admitted him to the Nursing Home. She said he could not use his phone anymore. She said he also lacked the cognition to use his call light.</p> <p>Resident #3's Daughter said she visits 2 or 3 times a week and 2 other sisters visit at least once a week. She recalled Staff H working alone some evenings. The family member said she asked Staff H 2 evenings in a row if anyone else would help her. She did not remember the date; either late November or early December. She said Staff H told her someone did not show up for work. Resident #3's Daughter said you cannot predict when he might decide to get up on his own.</p> <p>An interview on 1/9/20 at 12:18 p.m. with Staff H revealed she discovered Resident #3 when he fell</p>	F 689

F 689	<p>Continued From page 41</p> <p>notification that Resident #4 fell and she obtained an order to send the Resident to ER to be evaluated for left rib pain. The RN also noted that she informed Resident #4's family.</p> <p>A Nurses Note dated 12/9/19 at 6:52 p.m. revealed that ER notified them that Resident #4 had fractures of the 7th, 8th, 9th and 10th ribs on the left.</p> <p>A document titled Half Hour Checks note intermittent ½ hour checks of Resident #4 completed from 12/20/19 thru 1/15/20.</p> <p>An interview on 1/6/2020 at 11:20 p.m. with Staff L, CNA revealed that Resident #4 did not need help to transfer when she first admitted to their facility. Staff L said her transfer status changed where she needed 2 people to help her once she broke her hip. The CNA believed Resident #4's most recent fall on 12/7/19 happened when she self-transferred because a UTI caused her to be anxious and hallucinate. The CNA said she also had a history of self-transfers prior to that fall. Staff L said the Resident told her after her first fall that she thought she was capable of doing things for herself and did not want to bother them. Staff L said Resident #4's patience depends the day and her mood; she may or may not wait for help after calling out.</p> <p>An interview on 1/6/2020 at 12:25 p.m. with Staff C, RN, revealed that Resident #4 had a history of self-transferring. The RN said they keep her out in the common area when restless or hallucinating. According to the RN, Resident #4 has had "sundowners" (effects of dementia) since she admitted to their facility which caused the resident to experience paranoia and see things.</p>	F 689

F 689	<p>Continued From page 43</p> <p>asked, she assumed they discontinued the frequent checks because the resident did not fall for quite a while. The DON said it would not be reasonable to do the checks indefinitely. When asked about other interventions listed on the Resident's Care Plan, the DON said she also wondered why bed alarms were listed because they do not use them in the facility.</p> <p>An interview on 1/15/20 at 9:15 a.m. with Staff D, CMA revealed that Resident #4 with a history of self-transferring. The CMA said they try and remind her to push her call lite and she says "oh that's right honey". According to the CMA, the resident knew how to use the call light, but forgetfulness and confusion prevented her from using it. Staff D said they can hear her say "is anybody out there" at times when they are near her room. Staff D said being forgetful and confused caused Resident #4 to fall when she self-transfers. The CMA said she checked on her every 15 or 30 minutes. The CMA said she will bring her out to the nurse's station if she cannot figure out what the Resident wants/needs. Staff D said she knows Resident #4 thinks she can get up and walk by herself so she reminds her to call for help.</p> <p>A subsequent interview on 1/15/20 at 12:07 p.m. with Staff K revealed how she considered Resident #4 to be very unpredictable; even more so since last July. According to Staff K, they recently started frequent checks (documented since 12/20/19 to the time of interview) on her again because of being so unpredictable. Staff K said frequent checks are not on the care plan; therefore not everyone does frequent checks. She said some of them do it to keep a closer eye on her.</p>	F 689
