The MDS further identified the resident's balance as unsteady and he/she could not stabilize without human assistance when moving from a seated to standing position, or during a surface to surface transfer.</p> <p>Review of post fall investigation forms identified Resident #1 had four recent falls (on 3/9/12, 3/13/12, 3/23/12 and 4/16/12).</p> <p>The Elopement Assessment completed on 1/4/12 determined Resident #1 did not have a potential for elopement. 	<p>been placed on Resident #1 due to his/her confusion and increased mobility in his/her wheelchair. Staff documented the resident's care plan as updated.</p> <p>Resident #1's Treatment Administration Record (TAR) dated April 2012, documented staff were to check the placement and functioning of his/her wanderguard which had been placed on the resident's wheelchair. The TAR documented staff signed the entry every shift three times a day from 4/1/12 to 4/24/12 indicating Resident #1's wanderguard bracelet had been checked and functioning.</p> <p>Review of a Resident Care Plan with team signature dates of 7/15/11, 10/13/11, 1/12/12 and 4/12/12 included a problem in regards to the resident's short and long term memory problem. The care plan included a goal for the resident to remember where he/she resided and his/her name. The care plan lacked any intervention regarding the resident's wanderguard bracelet until after the resident had been found outside the facility on 4/24/12.</p> <p>Review of an Elopement Report form, with a date of elopement of 4/24/12, revealed the facility Administrator discovered Resident #1 sitting outside in his/her wheelchair approximately 31 feet from the front door of the facility. The elopement report documented the resident opened the front door of the facility on 4/24/12 at 4:37 P.M.</p> <p>On 4/24/12 at 4:41 P.M., the facility Administrator exited the front door and redirected the resident back inside the facility front door at 4:44 P.M. Further review of an investigation report dated 4/27/12 regarding the above occurrence, revealed the resident and/or the resident's wheelchair lacked a wanderguard bracelet when found outside on 4/24/12, thus no alarm sounded when the resident exited the building at 4:37 P.M. The investigation revealed Resident #1 received a different wheelchair provided by Hospice services on 4/20/12 at approximately 2:00 P.M. and staff failed to transfer the resident's</p>
